March 2020

Please complete at least one task from each column.

If you want to challenge yourself further, include the shooting star challenge - remember the sky is the limit!

Science	History/Geography	D&T/Art/Music
<p>In science, we have been looking at the properties of materials. Research the inventor Spencer Silver. Who is he? When / Where did he live? What did he invent? What are the properties of his invention? How is it useful? This can be displayed as a comic strip</p>	<p>After the Easter break, we will be changing our topic to South America. Choose a South American beach and compare its climate to a beach in Greece. How are they similar / different? What wildlife can be provided in South American due to the change in climate?</p>	<p>After the Easter break, we will be changing our topic to South America. In D&T, we will be making South American food. Follow a recipe at home and make a South American dish. This can be sweet or savoury. We appreciate that it may be difficult to source ingredients. If you are unable to do this, research common ingredients that we use that originate from South America.</p>
 What could you improve from the invention?	 Can you include the beach's Beaufort Scale?	 Can you rewrite this into your own recipe to share with the class?
<p>Choose between the Fireworks in a Glass and Fun With Density experiments, provided on the Year 5 page. Complete the instructions and write a conclusion of what you found.</p>	<p>Football is the most popular amateur sport in South America. With your knowledge of football, put together your dream South American team. Include players and what South American team they currently play for.</p>	<p>There are lots of different styles of art in South America. One in particular style is called Mola, which is quite similar to Pointillism. Research Mola art and create your own piece.</p>
 How did the experiment work? Which properties of the materials made your experiment successful?	 Can you include their position when they play, their number and how many goals they have scored?	 Most Mola art centres around wildlife. Can your Mola art include a South American animal?
<p>We have been looking at processes to separate materials in mixtures (magnetism, filtering and sieving). Read through the Separating Mixtures PowerPoint and choose a few processes to try at home. Take photos of your experiments and explain the method of separating.</p>	<p>NEW FOR WEEK 2: For History, research important Ancient Greek figures. Choose one to create a factfile, 'A story of their life' or a biography about them and what they did in Ancient Greek Times. You could print photos of them or draw them too if you wanted.</p>	<p>In music, we have been looking at Motown music. Research which instruments are most popular for Motown songs. What is used in 'Dancing in the Street'? Display this however you would like: Top Trumps of instruments, a factfile etc</p>
 Which mixtures cannot be separated?	 Would they still be significant for modern life today?	 How do the instruments change the songs? How would the songs sound without the instruments?
